Summary

I am a Computer Science graduate-in-training from Tshwane University of Technology who has completed all academic modules and is currently seeking Work-Integrated Learning (WIL) or workplace experience to obtain my qualification. I have experience building basic web applications using Java, JavaScript, HTML, CSS, MySQL, Git, and GitHub. I am a motivated and curious individual with a strong willingness to learn, adapt, and contribute to a professional work environment. My goal is to gain practical industry experience and grow my skills while adding value to the organization.

Skills

Programming
Java, JavaScript

Web development
HTML, CSS

Database management
MySQL

Version control
Git, GitHub

Personal Skills

Microsoft office
Attention to detail

Problem solving
Teamwork

Self-Motivation
Creativity

Work ethics
Critical thinking

Time management
Adjust easily to new tools

Education

Diploma in Computer Science

Tshwane University of Technology   2022: WIL pending

Reference

Name: Mr. Vuyisile Memani (Lecture)

Contact detailes: MemaniV@tut.ac.za | 012-382-9749

National senior certificate

Msengi secondary school   2021

Experience

1. **Personal & Academic Projects**

Designed and developed multiple responsive web and mobile applications using modern technologies. Focused on clean code, user experience, and solving real-world problems.

Projects

- **Vehicle Management System**
  The Logistics Management System (School project) is designed to streamline and digitize the management of organizational vehicles, trips, and inspections. The system ensures efficient scheduling, tracking, and maintenance of vehicles while maintaining compliance with data privacy regulations. The web-based application will serve two main user roles: Admin (Facility Lead) and Employee (Driver/Staff), each with tailored functionality.
- **Portfolio**
  This portfolio website was built from scratch using HTML for structure, CSS for styling, and JavaScript for interactivity. It features my personal profile, technical skills, and a collection of projects I have developed. The design is clean, responsive, and created to give potential employers a clear view of my abilities as a front-end developer.
- **Abahlali freedom party**
  The Abahlali Freedom Party Web Application is a lightweight, secure, and user-friendly platform designed to streamline digital communication and document management between the party's administrators and its members. The system allows registered users to upload important documents, while administrators manage updates and access uploaded files through a protected admin dashboard. (This project is 50% done)
